

## RJ-CW 24/25

### Features

- Single or two-stage options
- Wash up to 24 containers per cycle
- 360° rotating spray nozzles
- Efficient and safe for operators

The RJ-CW 24/25 is ideal for use in removing high levels of contamination from pails and small containers. With the direct force from the wash liquor sprayed at 5-6 BAR along with the indirect impingement caused from the 360 degree rotating spray nozzles, small containers can be cleaned to a repeatable, high standard with every wash cycle.

Manufactured out of stainless steel, this machine is built to withstand even the most demanding requirements from the industry and can be used across a wide range of applications. On top of this, the configuration of cycle timers and temperatures allows your operators to have full control of the wash cycle, whilst inter-locking doors protect the workforce from exposure to heat and wash chemicals throughout the cycle.

## RJ-CW 24/25 - Container Washer

With the ability to wash up to 1152 containers in one shift, the RJ-CW 24/25 offers a specialised cleaning solution to operations requiring a high throughput rate.

Available as a single-stage or two-stage machine, this container washing machine can be designed to suit the specific needs of the operation whilst providing the highest quality of cleaning and decontamination.

With this high level of cleaning, the RJ-CW 24/25 can prepare small containers for reuse or disposal whilst eliminating the risk of cross-contamination.

Throughput	2104mm
Height	2104mm
Width	1598mm
Length	1490mm
Tank Capacity	125L
Filtration	>10 micron
